

## WYMIAR PO MONTAŻU

---

## WYMIAR TECHNICZNY

A wall panel in the shade of natural wood, which will become an extraordinary decoration, making even an ordinary wall an atmospheric element of an interior arrangement. Made of PolyForce material, it provides water resistance, making it perfect for the kitchen, bathroom or other rooms exposed to constant contact with moisture. The product was created using the patented ScratchShield technology, ensuring extreme surface hardening. The length of the slats is 270 cm, so it can be installed in one piece, without the need to create unsightly joints.

Easy, quick and clean installation using **Mardom FixPro** or **Mardom Max adhesive**.

Possibility to finish panels with dedicated ends - **left** and **right**.

The product is entirely made in Poland.

Length: 270 cm

Width: 12 cm

Depth: 1.2 cm
